10. Legal Notice
11. Annex & Solscan Checklist

1. Introduction

SOCIUS Coin is a utility/community token built on the Solana blockchain, focusing on real usability in daily life, clear governance, and operational transparency.

2. About SOCIUS

2.1 Origin:

SOCIUS was born from the conviction that digital assets only have lasting value when they combine utility, responsible governance, and transparent execution.

2.2 Problem we address

- Information asymmetry between projects and investors
- Lack of accountability and transparency in crypto initiatives
- Little integration with the real economy and local commerce

2.3 Approach

- Utility-first
- Clear governance
- Technical Transparency
- Responsible Treasury
- Pragmatic Compliance

2.4 Value Proposition

- Currency for everyday payments
- Creation of a partner ecosystem (stores, services, and e-commerce)
- Lean, efficient, and sustainable model focused on the community

2.5 Principles

Transparency • Security • Community

- – Transparency – clear and accessible information, with on-chain proof of operations.
 - – Security – good technical practices and protection of users and funds.
 - – Community – focus on engagement and real benefits for users.
-

3. Rede & Parameters of the Token (Solana)

Blockchain: Solana

Mint: BMvVEs2ryg4dUDxC7VKR6GJJkPxOAsc3QW1FdT8aky5k

Ticker: SCS

Total Supply: 811,666,999

Decimals: 4

Explorer: Solscan

3.1 Metaplex Metadata

name: SOCIUS

symbol: SCS

4. Transparency & Authorities

- Mint Authority: renounced (11111111...)
- Freeze Authority: N/A
- Update Authority: CzKzEr4s...
- Founder Wallet (RT): CzKzEr4s...

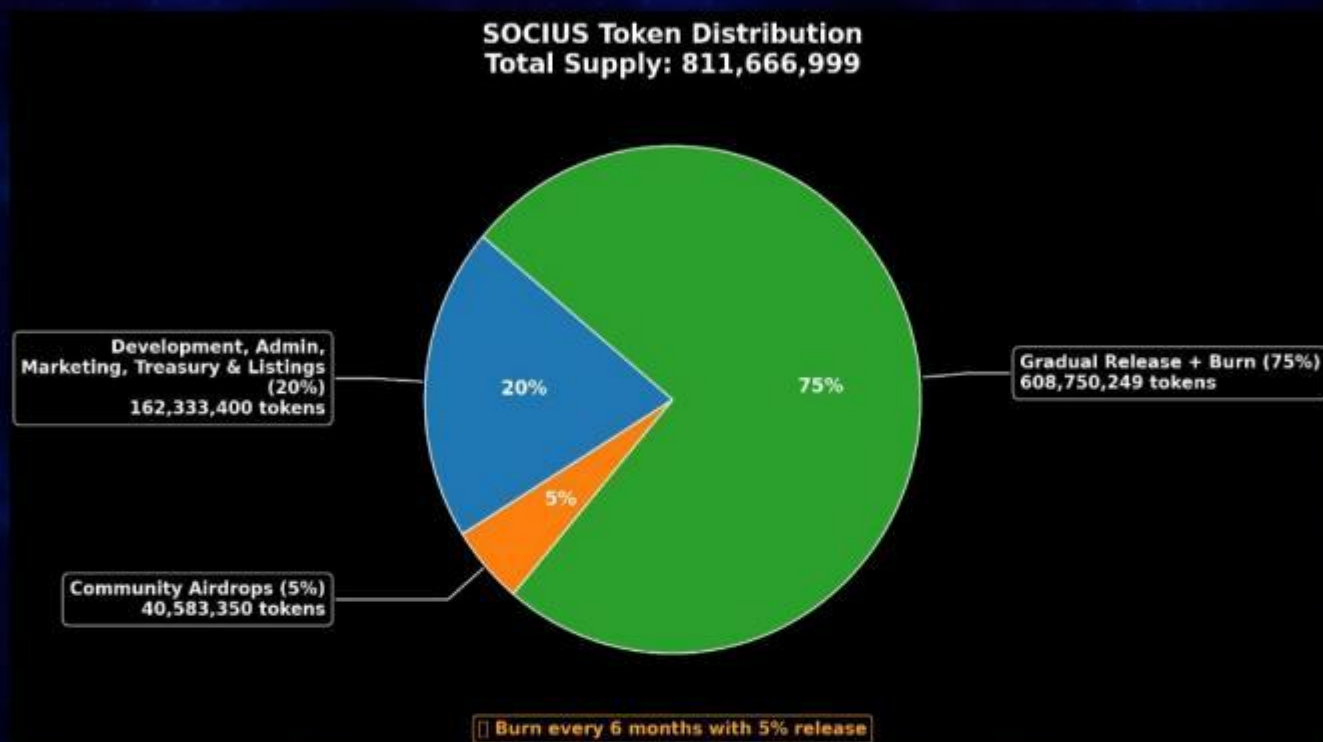

Security Note:

The Mint Authority has been permanently revoked, ensuring that no new tokens can be created after the initial launch. This measure protects investors and ensures that the total supply is fixed and immutable, reinforcing the project's transparency and credibility.

5. Tokenomics

5.1 Distribution

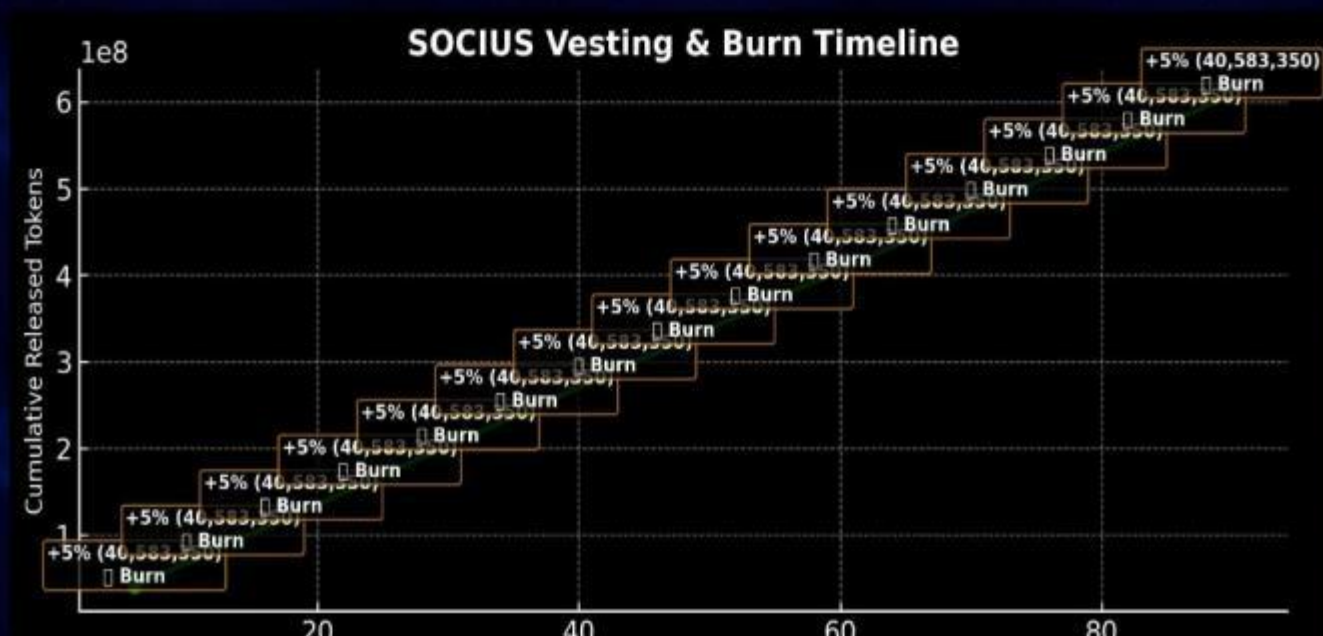

- 20% — Dev/Admin/Marketing/Treasury/Listings = 162,333,400
- 5% — Community Airdrops = 40,583,350
- 75% — Gradual release + Burn = 608,750,249

5.2 Vesting & Burn

5% every 6 months + proportional burn

5.3 Summary Table

6. Use Cases

- Payments: use of the SOCIUS token in everyday transactions, fast and low-cost.
- Discounts: exclusive benefits and reductions for users and business partners who accept SOCIUS.
- Airdrops: periodic distribution of tokens to incentivize the community and reward early adopters.
- POS/e-commerce Integration: direct acceptance in physical point of sale systems and online platforms.

7. Team

- RT — Founder & Strategy
 - * Responsible for vision, global strategy, and ecosystem development.
 - SOCIUS Dev Team — Development
 - * Technical team dedicated to the implementation and maintenance of the smart contract, integrations in Solana and infrastructure security.
 - SOCIUS Marketing — Marketing & Community
 - * Management of social networks, adoption campaigns, and community expansion.
 - Ana M. — Finance & Treasury
 - * Treasury management, liquidity control, and monitoring of listings.
 - Advisors & External Partners.
 - * Network of strategic consultants, technical and commercial partners that support the project's evolution.
-

8. Roadmap

- Phase 1: Fundamentals:

- * Official website, whitepaper, official channels, and initial branding.

- Phase 2: Liquidity & First Listings:

- * Listing on DEX (Raydium) with initial liquidity injection, integration with wallets Solana and first airdrops.

- Phase 3: Partnerships + POS/e-commerce:

- * Creation of strategic partnerships with local businesses, integration in POS/e-commerce, start of targeted marketing campaigns.

- Phase 4: International scale:

- * Expansion into external markets, additional listings on CEX, development of use cases advanced and evolution of the global community.
